Subject: Fire Prevention Week, October 7 - 13, 2018

### **Background:**

Fire Prevention Week will be held October 7-13, 2018. This year's theme "Look. Listen. Learn. Be aware – fire can happen anywhere." The latest statistics from the National Fire Protection Association (NFPA) show that if you have a reported fire in your home, you are more likely to die today than you were a few decades ago. This startling statistic is behind this year's theme.

This theme identifies basic but essential ways people can reduce their risk to fire and be prepared in the event of one:

- Look for places fire can start
- **Listen** for the sound of the smoke alarm
- Learn two ways out of each room

From October 7 - 13, fire safety advocates across the country will work to remind the public that fires can and do still happen – at home, as well as other locations – and that there are basic but vitally important steps people can take to remain safe. The San Ramon Valley Fire and Life Safety Division would like to lend our support by declaring October 7 - 13 as Fire Prevention Week in the San Ramon Valley.

In addition to Fire Prevention Week, we would like to deem the entire month of October "Fire Prevention Month" and celebrate with the following activities:

- A press release will be sent to local media regarding this year's theme
- Engine visits to all Kindergarten classes. These visits will consist of the "Hug-a-Firefighter" program, a lesson on getting out and staying out when the smoke alarm sounds, and a tour of the fire engine.
- Members of the Fire and Life Safety Division will participate in the Danville Fall Festival on October 20 and 21 to raise awareness and carry forward the theme.

We are looking forward to another great Fire Prevention Month and hope you will support our efforts.

Dear Firefighters of San Ramon Valley FPD

I was an evacuee of the Carr Fire. I was so lucky to be able to come home to my house. I thought I was going to lose everything. It not only did not burn but was not looted.

I can't thank you enough for all the hot, hard and exhausting work you did and you did not even know me. So many of you risked your lives for a total stranger. The human spirit prevails in time of war, disaster and crisis. In the future if I am being cynical about the state of mankind, I will think again.

Bless all of you and you are in my prayers to come home safe from this and all future fires.

Forever grateful,

Xuchi Judi Haseltine

Dear Firefighters and all those who support you,

Thank-you, thank-you, thank-you. It is difficult to put into words how grateful we are.

What you do is nothing short of heroic. Your commitment, bravery, and selflessness are remarkable. Although we were evacuated for several days, we also recognize that you were also away from your homes and families.

Lewiston is getting back to normal, school will start on Monday, and the smoke is lifting. If you are ever up our way to enjoy our beautiful area, please stop in and enjoy a 'cold one' on us.

Gratefully,

ERF Fire Response Urban

### Goal 1

Distribution of Fire Stations for Built-up Urban Areas of Greater than 2,000 People per Square Mile

To treat and transport medical patients and control small fires, the first-due unit should arrive within 7 minutes total response time, 90 percent of the time from the receipt of the call in fire dispatch. Total response time equates to 1 minute dispatch time, 2 minute crew turnout time and 4 minutes travel time spacing for single units.

### Goal 2

Distribution of Fire Stations for Suburban Areas of 1,000 to 2,000 People per Square Mile

The first-due fire unit should arrive within 8 minutes total response time, 90 percent of the time.

### Goal 3

Distribution of Fire Stations for Rural Areas of Less than 1,000 People per Square Mile

The first-due fire unit should arrive within 15 minutes total response time, 90 percent of the time.

### Goal 4

Effective Response Force (First Alarm) for Urban Areas of Greater than 2,000 People per Square Mile

To confine fires near the room of origin and to treat up to 5 medical patients at once, a multiple-unit response of at least 15 personnel should arrive within 13 minutes total response time from the time of 911 call receipt, 90 percent of the time. This equates to 1 minute dispatch time, 2 minutes crew turnout time and 10 minutes travel time spacing for multiple units. Suburban areas should receive the full first alarm within 14 minutes total response time, 90 percent of the time with the goal to limit the fire spread to the area already involved upon the arrival of the effective response force. For rural areas, this should be 21 minutes, 90 percent of the time. Outcome goals in these areas would be to confine fires to the building of origin and to care for medical patients.

### Goal 5

Hazardous Materials Response

Respond to hazardous materials emergencies with enough trained personnel to protect the community from the hazards associated with the release of hazardous and toxic materials. Achieve a total response time consistent with Goal 1, Goal 2 and Goal 3 with the first company capable of operating at the California OSHA First Responder Operations (FRO) level. After size-up and scene evaluation is complete, a determination will be made whether to request the on-duty District Hazardous Materials Team and/or other appropriate resources.

### Goal 6

Technical Rescue

Respond to technical rescue emergencies with enough trained personnel to facilitate a successful rescue. Achieve a total response time consistent with Goal 1, Goal 2 and Goal 3 with the first company capable of operating at the California Rescue System 1 (RS1) level. After size-up and scene evaluation is complete, a determination will be made whether to request the on-duty District Rescue Team and/or other appropriate resources.

### Goal 7

Call processing and turnout times

A concentrated focus will be placed on systems, training and feedback measures to crews to lower dispatch and turnout time reflex measures to national best practices of 1 minute for dispatch and 2 minutes for fire crew turnout, 90 percent of the time.

### Goal 8

Effective Response Force for Advanced Life Support (ALS) Medical Emergencies

To treat medical patients requiring advanced procedures and skills (defined as Charlie, Delta or Echo), a two-unit response consisting of one paramedic-staffed ambulance and one additional paramedic-staffed unit for a response force of at least five personnel should arrive within 6 minutes travel time in urban areas and 7 minutes travel time in suburban areas, 90 percent of the time. For rural areas, excluding Mt. Diablo State Park, personnel should arrive within 18 minutes travel time 90 percent of the time.
