

# Poster Instructions

*Your poster will print out on 16 sheets of standard 8-½" X 11" paper*

1. Starting with the top row, cut along the right side border of each sheet, removing the white area. Leave all four borders intact on the far right piece at the end of the row.
2. Line up each trimmed piece with the next piece to the right, overlapping and covering the white border. Tape pieces together from either the front or back.
3. Repeat with the next row down, except remove the top border and the right border so it will line up and overlap the piece above it. Only remove the top border for the far right piece at the end of the row as shown below.
4. Repeat the previous step for the remaining two rows.
